Muta section for glyphosate CARC meeting 9.9.15.docx

Hi Nancy,

Will you please take a look at the muta section I wrote for the CARC document for glyphosate? The CARC meeting is next week. Jess would like to get the full document posted by noon today. If you don't have any "show stopping" issues with it, we will go ahead and post it. Anwar will be presenting the tumor data and Jess asked me to present the muta section for him since the chemical is in my branch. We can make any edits to the document after the meeting if you have minor changes/suggestions after you review the entire CARC document and supporting materials. Jess just wants to make sure you don't have any major issues with it before it is sent to the full committee.

Thanks!!!

Greg
